Independence Tube can manufacture high-strength, low alloy (HSLA) structural steel tubing available in 50,000, 60,000 and 70,000 psi minimum yield strengths. HSLA tubing provides a greater strength to weight ratio than ASTM A500 Grades B & C.

Manufactured to the dimensional tolerances of A500, HSLA with its improved mechanical properties can offer an increase in load bearing capabilities while reducing wall thicknesses.

Minimum order required.

60,000 minimum yield or less
70,000 minimum yield or less
80,000 minimum yield or less
