NUCOR CORPORATION CERTIFICATION

STATEMENT ON PER- AND POLYFLUOROALKYL (PFAS) SUBSTANCES

To whom it may concern:

Nucor carefully evaluates information provided by its materials suppliers for the presence of per- and polyfluoroalkyl substances (PFAS) including Perfluorooctanoic Acid (PFOA), Perfluorooctyl Sulfonate (PFOS), and PFOA substitutes including certain linear and branched perfluorocarboxylic acids (C9-C14 PFCAs), their salts and related substances, in all materials used in support of Nucor's steel products manufacturing. While Nucor does not test its steel products for the presence of these PFAS substances, Nucor does not directly or indirectly utilize these chemicals in any of its manufacturing processes.

Per- and polyfluoroalkyl substances (PFAS) are globally regulated as toxic chemicals and substances of very high concern (SVHC) under programs including Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Regulation (EC 1907/2006), EU Regulation 2019/1021 on Persistent Organic Pollutants (POPs), Toxic Substances Control Act (TSCA), Emergency Planning Community Right-to-Know Act (EPCRA), and California Proposition 65, among other environmental and consumer product safety laws. Additionally, recent EU regulation 2021/1297 further restricts the use of PFOA substitutes, including certain linear and branched perfluorocarboxylic acids (C9-C14 PFCAs), their salts and related substances.

Article 33(1) of the EU REACH Regulation requires that Nucor, as the manufacturer of an article that contains more than 0.1% of an SVHC, supply the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance. Similarly, EPCRA Section 313 requires Nucor to supply notification to its customers of listed toxic chemicals above certain regulatory thresholds contained in its products. To the extent that a Nucor product contains a REACH SVHC or listed EPCRA toxic chemical above the regulatory thresholds, Nucor supplies this information on its safety data sheets (SDS), which are provided to each purchaser at the time of purchase, and available at <https://www.nucor.com/certifications/> or upon written request.

If you need additional information on a specific Nucor steel product, please contact:
